DRILLING FOR OIL.

Operations Begin on the Farm of F. Baker, of Troy. Special to The Scranton Tribune.

Towarda, Dec. 27.-Drilling for oil and gas has begun at Troy on the W. F. Baker farm, about one mile from the borough. The engine and boiler were brought from Bradford, where they had been used in sucking wells, It is calculated that when the machinery is in full operation the drill will make progress at the rate of 100 feet per day, as there are no igneous rock within several hundred feet of the surface. Sea level at Troy is 1.154 feet below the surface, and it is the intention to go that deep before abandoning the profect.

The parties interested are sanguine that either oil or gas will be struck, and in that event it is expected that a boom will take place in Troy and great changes will occur.

### THE MARKETS.

Wall Street Review.

New York, Dec. 27.—The market for se-curities showed the effect of the great re-tief felt by the dissipation of several fac-tors of apprehension and prices mounted WYOMING.

The flour and feed mill of James
Fowler & Sons was broken into Sunday night and a small amount of money and some choice Havana clgars taken. The safe is never locked, so the burglars had no trouble in getting it open. They took out all the papers and specialties gains were even more striking, quite a number having advanced from 4 to 10 points as a result of the day's trading. The demand from an outstanding short interest to cover accentuated the streigth of the latter group, those which have recently suffered most showing the greatest benefit from the day's business. Brocklyn Transit was almost a solitary exception and was subject to vigorous attacks all day in an effort to unsettle the market and check the advance. But this stock although it ranged over more than four points, closed with a net less of only a point. The leading influence in the imprevement of sentiment was the quiet and orderly manner in which the periodical settlement on the London Stock exchange proceeded. Grave fears were felt that the recent shrinkage in values as a result of adverse war news would prevent many operators on the London exchange from meeting their engagements at the current settlement. The gagements at the current settlement. The news this morning that no acute difficulties had developed, that money conditions were easy and prices inclined to advance, rather than to decline, brought immense relief, which was premptly reflectmense relief, which was promptly reflected at the opening hour in an advance all along the line. The only notable check came with the news of the failure of a Boston stock exchange house, but this influence was only temporarily and slight. The conditions in the noney market were notably easy, and one of the largest individual money lenders in the street made large loans to carry over until next Tuesday at the rate of 6 per cent. The current rate ruled from 4 to 5 per cent. The close of the year is universally expected color of the year is universally expected to terminate the period of severe stringency, and to be followed by relaxation, owing to disbursements of dividends and interest, which will be on an unprecedented scale. The trading did not take on any great animation until near the close and the individual transactions were not and the individual transactions were not on a large scale. In fact, the number of odd lots traded in was a feature of the day, and reflected the investment demand by buyers who take stocks out of the market to lock up and keep. Total sales today, 664.300 shares. Investment buying was in evidence also in the bond market, wherever the fall in prices had offered opportunity to secure fair return on money invested. The bond market was settive and strong throughout. Total and the individual transactions were not active and strong throughout. Total sales, par value, \$2,320,000. United States new 4s declined ¼ in the bid price.
